Distribution, lithology and provenance of peridesert loess deposits in northeastern Iran

The thick Chinese loess deposits are non-glacial loess having been blown in from deserts in northern China. Both the local and few global studies lack information on the variability in loess thickness, continuity, and areal extent. The chart constructed by Colin Bunce shows events and stages on the journey from the initial loess particles to the bricks made by Smeed Dean.

Leonard Horner in Bonn 1831

The products of abrasion show that both coarse and fine silt sizes are produced.

The Western Pacific Working Group of the INQUA Loess Commission: expansion from Central Europe

An enthusiasm for loess: Leonard Horner in Bonn and Liu Tung sheng in Beijing.

Loess Ground

The brickmakers at Uxbridge would contract for 15 or 16 thousand chaldrons of cinder-dust. Loess encounters of three kinds: Charles Lyell talks about, reads about, and looks at loess. Some interesting questions emerge: what sort of silt does greywacke produce? Hibbert- and on the same course medicine; some years ahead of CD.

Distribution, lithology and provenance of peridesert loess deposits in northeastern Iran

Katra Journal of Geophysical Research: Earth Surface 2020. These birds have a determined preference for loess ground to dig their nesting tunnels; the presence of nest tunnels suggests the occurrence of desert loess, in desert fringe regions.

GENESIS OF THE RYKER AND ASSOCIATED SOILS IN SOUTHERN INDIANA

The effect on the collapse process of prolonging saturated conditions is identical to the effect of an increase in the applied load. Other characteristics of the London Stock result from its method of manufacture, two stages being especially important.
