These results do not require differentiability of the social welfare function. In fact, in many of the famines, food availability actually rose as compared to non-famine years. The Political economy of hunger , WIDER studies in development economics.

Inequality, Welfare and Poverty: Theory and Measurement: Vol. 9

There are structural power inequalities in promoting globalisation and shaping its course.

8 Theories of Globalization

In order to make their approach applicable to international comparisons, we extend their criterion to the case of different marginal distributions of household types, and derive a sequential stochastic dominance criterion that highlights the importance of first order dominance of the marginal distribution of household characteristics for obtaining consistent rankings of income distributions. This helped the top 10%, who own 84% of the wealth in stocks and bonds. Peasant China in Transition: The Dynamics of Development toward Socialism, 1949-1956.
