## Paleogeography and Tectono

Pitinga Formation is associated with deglaciation events observed in the Silurian final stages. . Along the western margin of modern North America, a major was present where the eastward-moving oceanic plate of eastern Panthalassa slid under the continental plate of Pangea.

## Stratigraphy

The Bouguer map for the Marajó Basin and surrounding areas is shown in.

## Structural Framework, Stratigraphy, and Evolution of Brazilian Marginal Basins1

Therefore, whether these root casts were contemporaneous with deposition of the mudstone or superimposed afterward, they represent a significant shallowing event at the end of PAC 1 time and before the beginning of PAC 2. During the Eocene-Oligocene the major hydrographic basins of the Amazon region Solimões, Madeira, Negro, Amazonas etc. Open - Buy once, receive and download all available eBook formats, including PDF, EPUB, and Mobi for Kindle.

## Stratigraphy, tectonics, paleoclimatology and paleogeography of northern basins of Brazil

Since the mid-20th century more complete sequences have been discovered in North America, and these now serve as the standard for Triassic

time in general. Here, we present a substantially revised stratigraphy for the Congo Basin, based on new field observations, seismic and borehole data, together with paleontology and new geochronology.
