Factional Competition and Political Development in the New World

They document the effects of factionalism on the structure of particular polities: for example, how it might have led to the growth of social inequality, or to changing patterns of chiefly authority, or to state formation and expansion, or institutional specialisation. Even for the quite recent past, the gaps and biases of historical records provide ample opportunity for archaeology to complement history. She advocates for a different, more distinct understanding between a faction and a party.
