Among other things, this language is alleged to lack all evidence for recursion, including embedded clauses, as well as quantifiers and color terms. History During the early 20th century, language was usually understood from a behaviourist perspective, suggesting that language learning, like any other kind of learning, could be explained by a succession of trials, errors, and rewards for success. In addition, it has been suggested that people learn about probabilistic patterns of word distributions in their language, rather than hard and fast rules see the distributional hypothesis.
