Black Botany: The Nature of Black Experience Archives

When a person signs up for a 23andMe genetic analysis, they can choose whether to make their data with any identifying information removed available for research. There are hundreds of gentian species, with the root of *Gentiana lutea* being a key ingredient of apéritifs, bitters, liqueurs and tonics to this day.

The coloniality of planting: legacies of racism and slavery in the practice of botany

Prepare the orgeat: Make a simple syrup by boiling 1 pint of water and 1 pint of sugar. In South Carolina and Louisiana, about 12% of European Americans have at least 1% African ancestry. North America is defined here as North America north of Mexico, and Hawaii and Greenland.

Botany at the Bar

Carver, as a scientist and artist, remained focused on enabling Black Americans to succeed.

When Botany Was for Ladies

Today, the company has about 800,000 customers. Looking around us today, we can see how this persists and, under conditions of Covid-19, has resurfaced to an alarming degree.

The Virginian

Norwood News regrets and apologizes to the individual in question for this apparent misunderstanding. The fact that so many people in the United States carry a mix of different ancestries could have important medical implications. During the pandemic, it has become apparent that the policing of lockdowns has disproportionately targeted people of colour whose only access to green spaces might be their local park; in London, the Metropolitan Police are twice as likely to fine Black people for breaching lockdown regulations, for example gathering in public spaces and parks, than white people.

The Botany of Desire

The first area opened 'was stripped of teak within twenty years' and by the end of the century about 10 million acres of Burma forest had been cleared. This was a record of plants cultivated by George Clifford in his garden at Hartekamp Holland and is the forerunner of *Species Plantarum*. The statement or statements on usage are followed by an abbreviated reference, for example, 184:197.

When Botany Was for Ladies

She used an ointment made from the bark of red alder to treat lymphatic disorders and tuberculosis. A backpacking trip around the world — a portion of which was spent in Nepal — inspired her to earn a B.
