Osteoarthritis Imaging: X

On an average day, roughly 35 diagnostic ultrasounds are performed at HSS, with an additional 15 ultrasound-guided injections for the treatment of hip pain. This must be monitored carefully in arthritic cats.

Arthritis Treatment in Cats

Both are messy, annoying, and unsanitary conditions that decrease the wellbeing of everybody in the household. Cats sleeping under the hood of a car that is then turned on can end up with severe cat injuries that can even lead to the death of your pet. Typically, the cat should be kept indoors a few days after surgery to prevent infections and other postoperative complications.

Imaging for Hip Pain

Hyaluronic Acid Hyaluronic acid is fluid within the body that lubricates joints.

When Is It the Right Time to Euthanize a Cat?

Your cat will be prescribed a short course of drugs and reassessed cat.

8 Unmistakable Ways Your Cat Says 'I Love You'

As well as being used to control surgical pain, we also use NSAIDs for provision of pain relief at home either following surgery or in long term conditions such as arthritis. Specifically, an X-ray of a joint with osteoarthritis will show a narrowing of the space between the bones of the joint where the cartilage has worn away, as shown in the image below.

How to Treat Arthritis in Cats

But for some patients, imaging studies may be recommended in order to precisely determine the source of the pain, make a diagnosis, and gain important information about the condition.
