Article 9

Field work and research conducted by Dr. Tumamoc Hill has a site on its top and has rock art all along the sides. In 2007, the United States Bureau of Land Management BLM had to close access to the canyon to off-road vehicles due to the damage it was causing local archaeological sites.

The Methodological Pathway

This area of study concerns human relationships with the sea 28.

Archaeological Survey

Many of these sites are remote and require a 4×4 or high clearance vehicle for access.

Article 9

These sealed doors have been installed to help control the internal environment of the house museums, protecting the interior fabrics and curatorial items from environmental damage. All profiles must include a scale and legend; 3.

An Overview of the Historic Period

Some archaeological investigations have focused on sites from a specific temporal or cultural affiliation, to the exclusion of others. Excavation units should be placed within a grid-coordinate system to ensure continuity.

Article 9

This information enables developers and contractors to identify the existence of archaeological remains that may be affected by their proposals and determines what level of archaeological work is required 6, 7, 8. Problems in the Middle East has seen catastrophic damage to cultural remains, but this problem is not new 15.

Archaeology and historic sites

Tool marks are visible there and in other locations within the cave Plate 4. Backhoe trenches: Describe backhoe trenches, methods used, discussing length, width depth and location. At this hearing, the appealing party shall set forth the alleged inconsistencies or non-conformities with procedures or criteria set forth in this Code; however, no new material or evidence shall be presented to or considered by the BCC.

How to Protect and Preserve Archaeological Sites: 13 Steps

Field maps should include locations of all areas investigated, including pedestrian and subsurface surveys; b. The department shall determine whether the application is a standard or special Certificate to Dig. Is the structure one of the few remaining examples of its kind in the neighborhood, PBC or designated historic district? Phase II investigations and the data recovery plan should guide the placement of test units at the site.
