The New Plastics Economy: Rethinking the future of plastics & catalysing action

Heating up plastics can increase the rate through which chemicals leach out, so try to avoid putting them in the microwave or dishwasher. Apart from the published market research reports, we also provide customized study on any topic to meet the varied and niche requirements of our clients.

Rethinking the future of plastics

Producers of plastic would also be required to contribute to help fund clean-ups in some countries.

Call for global treaty to end production of 'virgin' plastic by 2040

The New Plastics Economy report attracted global media coverage, reaching the attention of millions worldwide. A report by the NGO Tearfund last year, Coca-Cola, PepsiCo, Nestlé and Unilever were responsible for more than half a million tonnes of plastic pollution in six developing countries each year, enough to cover 83 football pitches every day. Matthew MacLeod and his colleagues warned the plastic pollution of the oceans and land is at a rate which cannot be tackled by any cleanup, particularly when it affects remote areas.

The New Plastics Economy: Rethinking the future of plastics

In 2018, the American Academy of Pediatrics AAP published saying that some chemicals in plastic, including bisphenols such as BPA and phthalates, may put, and that families reduce exposure to them. Request Pre and Post COVID-19 Impact Analysis on Dairy Plastic Packaging: The main goal of Dairy Plastic Packaging is to: — To provide a global market overview for Dairy Plastic Packaging. Studies in animals have also linked BPA to prostate and mammary cancer, as well as brain development problems.

The New Plastics Economy: Rethinking the future of plastics & catalysing action

In the lab, the team checked to see if the plastics were toxic in a variety of ways, including testing for components that acted as endocrine

disruptors, chemicals that can mimic hormones. Furthermore, the study estimates the size of the by product category, end-user applications, and leading main regions.

The New Plastics Economy: Rethinking the future of plastics & catalysing action

These second-generation feedstocks used for bioplastic products are gaining in popularity. Whether you are looking for new product trends, competitive analysis or study on existing or emerging markets, Market Research Store has best offerings and expertise to get the critical information for you.

A New Industrial Revolution for Plastics

It also defines an action plan for the global plastics industry to design better packaging, increase recycling rates, and introduce new models for making better use of packaging.

Rethinking the future of plastics

Diversion of organic wastes to composting is expanding across the country - there are currently 4,700 industrial composting facilities in the U.
