Aabian Cladding

The emission reductions are significantly enhanced if the reduced load on the superstructure with the resultant economies in structural frame and foundations are taken in to account.

GRC Cladding

To conclude — Why GRC? Asurco have been manufacturing GRC in Australia since the 1980s. This can be accommodated by increasing the thickness of the panel to overcome these stresses.

Global Glass Fiber Reinforced Concrete (GFRC) Market Research Report 2021: ReportsnReports

Glass Fibre Reinforced Concrete Panels and Cladding

It is formed in the same way as precast concrete, using bespoke moulds, but can be made in thinner sections resulting in lighter components. The absence of aggregate in the mix means that the lines of the panels are very sharp and the surface of the panels can be very smooth. Frey-Fil Specification and Application Table 79.
