The Mac doesn't have PMT at any level. With the recent announcement that Apple will acquire his Next Computer, and with it a more modern OS that features some of what the Mac OS lacks, hope springs anew. I've lost the URL but I saw a compatibility list of CD drives compatible with Next black hardware and a number of the Apple drives were listed.

University of San Francisco

Since I work at Omni: OmniWeb has what we feel is a very powerful framework that allows a plug-in to do many things that plug-ins can't do in Netscape.

Dr Katherine Inskip

Carstens would be happy to answer any questions you might have in the course of your study. Ehrlich and yourself under the auspices of USIS-Bonn were highly successful.

Professor Clive Tadhunter

A program that might be elegant under NeXTStep UI maybe just awful under MacOS UI. Fine publisher, 1985, page 219.
