Dynamic Programming Models of the Nonserial Critical Path

In particular, the project time minimization procedure results in less complex dynamic programming models and is thus employed in this paper. Presented at GICOLAG Workshop Global Optimization: Integrating Convexity, Optimization, Logic Programming, and Computational Algebraic Geometry , Vienna.

Please write comments if you find anything incorrect, or you want to share more information about the topic discussed above. . The extension of the result is achieved by establishing that even in the tree case DP computation effort is polynomial in the number of decision variables.

DYNAMIC PROGRAMMING APPROACH TO SCHEDULING OF NONSERIAL LINEAR PROJECT

Optimization Online - Nonserial dynamic programming and local decomposition algorithms in discrete programming - Nonserial dynamic programming and local decomposition algorithms in discrete programming Arnold Neumaier Arnold. The intent of this paper is to show that efficient nonserial dynamic programming formulations can be developed for several complex nonserial CPM-Cost problem situations.

Decision Diagrams and Dynamic Programming

The idea is to simply store the results of subproblems, so that we do not have to re-compute them when needed later. An example illustrates the computational steps, validates the calculation algorithm, and demonstrates the capabilities of the proposed procedure.
