The Rise of the Medieval World, 500

In addition, the was relatively weak, and its power was mostly confined to central Italy. The second-largest city was ; the other major cities with populations over 10,000 were , , , , , and.

People and Space in the Middle Ages, 300

It was the next native Persian dynasty after the collapse of the Sassanid Persian empire, caused by the Arab conquest.

People and Space in the Middle Ages, 300

May be repeated for credit. It was only the representation of the Third Estate which was furnished by election.

The Early, High and Late Middle Ages

Please don't call them 'scrolls'. The population of the imperial capital fluctuated between 300,000 and 400,000 as the emperors undertook measures to restrain its growth. His books generally received mixed reviews in academic journals, but were often popular bestsellers, buoyed by Cantor's fluid, often colloquial, writing style and his lively critiques of persons and ideas both past and present.
