The best known is the Green Man, a Celtic fertility god wreathed in leaves who was adopted by the church as a symbol of life, death and rebirth. The style evolved slowly and almost accidentally as medieval artisans combined ingenuity, inspiration, and brute strength to create a fitting monument to their God. The arches bear the ceiling load and pass it into the vertical stone columns.

Master Builders of the Middle Ages

We, in our own time, are building nothing at all which compares with the works of the master builders of the middle ages. در اواسط قرن دوازدهم،

Master builder of the Middle Ages and design build of today : an analysis and comparison

Kenilworth Castle: sacked during the Civil War These public works were intended to instill pride of ownership, not only in the ecclesiatic and royal authorities who held them in trust, but also, in the hearts and minds of the citizens who built and used them. Misericorde, Wells Cathedral Gothic cathedrals were usually supported on deep foundations and had thick walls to make them strong.

Medieval Masons

The significance is that it adds insight to the existing body of knowledge concerning medieval project management from the fifth to the fifteen century. Arches were supported using wooden frames called 'centring' which held the stones steady before the keystone at the top locked the whole thing into place.
