# Dynamic optimization - the calculus of variations and optimal control in economics and management /Morton I. Kamien and Nancy L. Schwartz.. --

North Holland, c1981. - Dynamic Optimization: The Calculus of Variations and Optimal Control in Economics and Management (Advanced Textbooks in Economics)

Description: -

-

Calculus of variations
Control theory
Mathematical optimizationDynamic optimization - the calculus of variations and optimal control in economics and management /Morton I. Kamien and Nancy L. Schwartz.. --

-

Dynamic economics : theory and applications -- v. 4
Dynamic economics : theory and applications -- v. 4Dynamic optimization - the calculus of variations and optimal control in economics and management /Morton I. Kamien and Nancy L. Schwartz.. --
Notes: Includes indexes. Bibliography: p. [315]-324.
This edition was published in 1981

Dynamic optimization the calculus of variations and optimal control in economics and management by Morton I Kamien pdf

We convert the nonlinear terms in constraints of problem to the corresponding linear terms. Table of Contents Preface to the Fourth Printing xi Preface to the Second Edition xiii Preface to the First Edition xv Part I Calculus of Variations Section 1 Introduction 3 Section 2 Example Solved 12 Section 3 Simplest Problem-Euler Equation 14 Section 4 Examples and Interpretations 21 Section 5 Solving the Euler Equation in Special Cases 30 Section 6 Second Order Conditions 41 Section 7 Isoperimetric Problem 47 Section 8 Free End Value 52 Section 9 Free Horizon-Transversality Conditions 57 Section 10 Equality Constrained Endpoint 65 Section 11 Salvage Value 71 Section 12 Inequality Constraint Endpoints and Sensitivity Analysis 77 Section 13 Corners 86 Section 14 Inequality Constraints in t, x 90 Section 15 Infinite Horizon Autonomous Problems 95 Section 16 Most Rapid Approach Paths 97 Section 17 Diagrammatic Analysis 102 Section 18 Several Functions and Double Integrals 112 Part II Optimal Control Section 1 Introduction 121 Section 2 Simplest Problem-Necessary Conditions 124 Section 3 Sufficiency 133 Section 4 Interpretations 136 Section 5 Several Variables 142 Section 6 Fixed Endpoint Problems 147 Section 7 Various Endpoint Conditions 155 Section 8 Discounting, Current Values, Comparative Dynamics 164 Section 9 Equilibria in Infinite Horizon Autonomous Problems 174 Section 10 Bounded Controls 185 Section 11 Further Control Constraint 195 Section 12 Discontinuous and Bang-Bang Control 202 Section 13 Singular Solutions and Most Rapid Approach Paths 209 Section 14 The Pontryagin Maximum Principle, Existence 218 Section 15 Further Sufficiency Theorems 221 Section 16 Alternative Formulations 227 Section 17 State Variable Inequality Constraints 230 Section 18 Jumps in the State Variable, Switches in State Equations 240 Section 19 Delayed Response 248 Section 20 Optimal Control with Integral State Equations 253 Section 21 Dynamic Programming 259 Section 22 Stochastic Optimal Control 264 Section 23 Differential Games 272 Appendix A Calculus and Nonlinear Programming Section 1 Calculus Techniques 291 Section 2 Mean-Value Theorems 294 Section 3 Concave and Convex Functions 298 Section 4 Maxima and Minima 303 Section 5 Equality Constrained Optimization 307 Section 6 Inequality Constrained Optimization 313 Section 7 Line Integrals and Green's Theorem 320 Appendix B Differential Equations Section 1 Introduction 325 Section 2 Linear First Order Differential Equations 328 Section 3 Linear Second Order Differential Equations 332 Section 4 Linear nth Order Differential Equations 339 Section 5 A Pair of Linear Equations 344 Section 6 Existence and Uniqueness of Solutions 350 References 353 Author Index 367 Subject Index 371 This introductory text offers a far-reaching, rigorous, application-oriented approach to variational theory that will increase students' understanding of

more specialized books and research papers in the field. Clear exposition and numerous worked examples made the first edition the premier text on this subject.

dynamic optimization calculus variations optimal de kamien morton schwartz

Used items may not include supplementary materials such as CDs or access codes. . This is an excellent textbook, although I can't compare it with the competition.

DYNAMIC OPTIMIZATION THE CALCULUS OF VARIATIONS AND OPTIMAL CONTROL IN ECONOMICS AND MANAGEMENT ADVANCED TEXTBOOKS IN ECONOMICS

Pages and cover are clean and intact.

Dynamic optimization the calculus of variations and optimal control in economics and management by Morton I Kamien pdf

However, it is missing a bunch of paragraphs.

Dynamic Optimization The Calculus Of Variations And Optimal Control In Economics And Management Advanced Textbooks In Economics PDF Book

Clear exposition and numerous worked examples made the first edition the premier text on this subject. I thought it was just my book, but I checked with my friends who bought it too it is required for one of our classes and their books had the same missing paragraphs.
