Load and Transform Guide

When creating a table, by specifying the salt keyword, trafodion will automatically add a hash prefix to the rowkey and pre split the table to ensure that the data is evenly distributed in the cluster. If it is done once an hour, the data sample analyzed is the data one hour ago, and the analysis results also lose the timeliness.

Architecture

Developers can add new rules to extend new optimization methods.

Architecture

Log on as user trafodion, password trafl23.

[TRAFODION

Sixty 60 seconds is the default.

Transactions = Trafodion / Caernarvonshire Historical Society = Cymdeithas Hanes Sir Gaernarfon

Both of these concurrent join methods require very large network and memory overhead.
