OCLC Classify

ISSN An ISSN is a standardized international code which allows the identification of a serial publication.

OCLC Classify

The database is searchable by many of the standard numbers associated with books, magazines, journals, and music and video recordings. OCLC numbers vary in length.

OCLC Classify

The Classify prototype helps librarians apply classification numbers to resources in library collections. The classification numbers applied to books and other materials are used to arrange items on shelves and to support browsing, filtering and retrieval of bibliographic information in online systems.

OCLC Classify

Enter ISBNs with our without hyphens. Enter all digits found on the item e. FAST headings provide additional subject information about a work and enable you to search the Classify database by subject.

OCLC Classify

. Hyphens or spaces usually separate the elements of the number on the item.

282664064

Libraries add bibliographic records to WorldCat representing books and other items in their collections. The UPC appears as a barcode symbol with 12 digits printed below it.

282664064

The Classify prototype is designed to help users apply classification numbers. An ISSN consists of eight digits in two groups of four, separated by a hyphen.

282664064
